

## SERVICES, STORAGE AND DATA NETWORKING FOR THE HOTEL DEL CORONADO IN SAN DIEGO, CALIFORNIA

**OBJECTIVE** The Hotel del Coronado in San Diego needed to expand its landmark property with the construction of beachfront cottages. The Hotel wanted the very latest in communication and connectivity options to meet the high demands of its clients. Those options included voice, data, AV, and security infrastructure.

**SOLUTION** VectorUSA engineers designed a cabling solution for the new cottages as well as the new spa and fitness center. The solution included voice and data cabling, wireless Internet access points, and coaxial cable for television and CCTV signals. VectorUSA delivered a comprehensive data network to more than 70 villa suites, coupled by more than 30 miles of copper wire and linked by two miles of fiber optic cable. The Hotel is now turning to VectorUSA as it plans for a new conference and business center.
