

## AUDIO VISUAL SOLUTIONS FOR THE ARIZONA ASSOCIATION OF REALTORS IN ARIZONA

**OBJECTIVE** The Arizona Association of Realtors is an information and support organization for Phoenix area brokers and realtors. The Association needed to upgrade its Audio Visual facilities to host a range of events and training sessions.

**SOLUTION** VectorUSA engineers designed an AV solution that utilized the Association's existing projector and projector screens. VectorUSA provided and installed an Extron 4x4 VGA distribution video switcher allowing the Association to display identical content to both projectors at the same time, or the flexibility to switch between four VGA input sources.

The system included two ceiling CT Gaudio microphones, a matching two-input CT Gaudio audio mixer, an Extron mono amplifier plus two Sony PTZ IP video conferencing cameras. System controls included Projector IR handheld remotes. The Extron MLC 226 IP MediaLink controller is an enhanced control panel for controlling AV equipment in any classroom or conference room. It standardizes the control interface for all systems, making display systems simple to use. The MLC 226 IP also included IP Link with GlobalViewer, a free Web-based AV resource management and remote control software application. As a result of VectorUSA's work, the Association is able to utilize the space as one large meeting area or divide the room into four separate spaces.
