

Success Story

As one of the largest, fully-automated manufacturers in the country, this Company specializes in the fabrication of rectangular, round and oval commercial HVAC duct.

Challenge

This Company had been lacking visibility into their billing structure and licensing within their Microsoft 365 platform.

The Company had been working on their office migration project with another cloud vendor that was not meeting their expectations.

The Company needed to replace their cloud vendor with a Cloud Solutions Provider, offering better insight, strategy, service, and price.

Solution

Our expertise and support with Microsoft 365 migration enabled us to quickly provide a project plan and schedule to transfer their Microsoft 365 services to VectorUSA and complete the migration.

Benefit

By moving to VectorUSA as their Microsoft CSP, our Client now enjoys better insight and cost savings through our license management, auditing and monthly reporting on their actual usage.

Furthermore, by leveraging our cloud expertise and support with Microsoft interfacing, our Client is benefiting from faster time to resolution, and a trusted partner in growing and expanding their cloud experience.
